Experience

AuraUI — **May 2024 - Present**
Frontend Developer — *Remote*
- Engineered the project using Nextra and Next.js, combining static and dynamic rendering with Markdown-based content for flexible site generation.
- Implemented responsive and intuitive UIs using Tailwind CSS, ensuring a seamless experience across devices.
- Automated updates by integrating GitHub APIs to dynamically load design components.
- Designed reusable components such as headers, footers, and sections, focusing on scalability and maintainability throughout the project.

Headstarter — **July 2024 - August 2024**
Software Engineer Fellow — *Remote*
- Built and deployed 5 projects in 5 weeks using Next.js, Firebase, Clerk, and Vercel, following agile methodologies.
- Collaborated with 3 fellows to develop a SaaS product for dynamic flashcard generation using the Gemini API, with paywall integration via Stripe API and authentication through Clerk.
- Developed an interactive fitness AI customer support agent using Next.js and the Gemini API in a team of 3.
- Gained hands-on experience with full-stack development and project management in a fast-paced environment.

Asva Capital — **June 2023 - May 2024**
Front End Developer Freelance — *Remote*
- Developed and deployed responsive landing pages using React.js, Next.js, Tailwind CSS, Chakra UI, and Vercel. Converted Figma designs into pixel-perfect web pages with smooth animations and optimized performance.
- Integrated backend APIs and Airtable for seamless data fetching and interaction, ensuring efficient communication between frontend and backend systems.
- Worked closely with cross-functional teams of designers and developers, ensuring high code quality through regular code reviews and maintaining design consistency.

Kyte — **Dec 2023 - Feb 2024**
Front End Developer Intern — *Remote*
- Led the creation of responsive web pages, ensuring smooth user experiences across various devices.
- Integrated Web3 wallet functionality for decentralized login and transaction handling on the platform.
- Used Material UI and Tailwind CSS to design dynamic, visually appealing, and highly responsive interfaces.
- Worked on three distinct projects, focusing on building and maintaining frontend components and architecture

Projects

Web3Campus | *Next.js, Tailwind CSS, Node.js, MongoDB*
- Web3-Campus empowers individuals to thrive in the decentralized future by providing education and hands-on experience with blockchain technologies
- Utilized Next.js, Node.js, and MongoDB for efficient data management, ensuring secure and scalable solutions for web3 projects.
- Developed fully responsive designs optimized for all devices, focusing on enhancing the user experience.

FlashLoom | *Next.js, Tailwind CSS, Clerk, Gemini API, Node.js, Firebase*
- Created a tool that rapidly generates study aids, enhancing the efficiency of learning and revision.
- Utilized Next.js and Material UI to build a design that ensures compatibility across all devices and screen sizes.
- Implemented user authentication using Clerk and integrated Firebase for robust data management and user management.

Technical Skills

Languages: HTML/CSS, JavaScript, TypeScript, Solidity
Frameworks/Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Material UI, ChakraUI
Tools/Technologies: VS Code, Linux, Postman, Clerk, Firebase,, GitHub, Git

Education

Amity University Patna — **June. 2020 – June 2024**
Bachelor of Technology in Computer Science — *Bihar, India*

Achievements

- ✳ Won the Polygon Pool Prize at the Road to Web3 Hackathon.
- ✳ Secured the IPFS Pool Prize at Doahacks Hackathon.
